

I use the instant traffic reports every day to plan my path home! I drive 72 miles each way because of the wonderful government we have and lack of jobs available at near locations of home that pay the lovely tax's and normal living expences !Let alone the programing on xm radio that I pay for! To take away the simple planing of my drive home would be ludicris and violating the freedom of speech also something that we all pay for! Try taking it off the TV also something I/we pay for see where i'm going with this! you dont see people bitching about that?
